

SIGNATURE SERIES 2018

QUAIL HILL INTERIORS

True 2" Slab Doors

HONEY COMB CORE

The innovation leader in custom interior doors

DISCOVER THE DIFFERENCE OF AN INTERIOR DOOR FROM QUAIL HILL

Enhance your home from the inside out with the Signature Series from Quail Hill's all-encompassing assortment of interior doors. They are designed to give a coordinated look throughout your home, and are custom made to meet your exacting standards and unique style.

Quail Hill Signature Series doors are custom built to your specific design, wood and hardware choice. *The Executive* shown here.

Quail Hill Signature Series doors feature a true 2" thickness with a custom hardwood veneer face and a 1/4" solid-wood edge to accommodate a 3° bevel.

LIGHT WEIGHT HONEYCOMB CORE — SUPERIOR PERFORMANCE AND STABILITY

Quail Hill uses an 1/8" cell, resin-impregnated honeycomb core. Honeycomb offers a core material that creates a light-weight, strong and extremely stable panel, free from the common problems associated with standard panel composition. The honeycomb core coupled with the 12mm LDF outer layers, sounds and feels like a solid core door with less hinge stress and effortless operation. Ideal for larger doors and for sliding or "barn door" applications. Offered in veneer and paint grade options.

THE DOOR JAMB SHOULD NOT BE AN AFTERTHOUGHT

For years Quail Hill has watched as nicely finished door jambs were butchered by installers using an 8 penny finish nail gun. Later, the painter fills the holes with a wax pencil. The result is an unsightly jamb the homeowner has to live with not realizing that there is a better approach.

“ WE VIEW THE DOOR AND THE JAMB AS A FINELY FINISHED PIECE OF FURNITURE AND INSTALL IT USING A NAILESS INSTALLATION. ”

After initial installation, Quail Hill protects the jamb with a 1/2" thick MDF jamb protector, completely protecting the jamb from damage during construction. The protector is removed at the end of the project prior to reinstalling your doors and door hardware. The result is a clean, flawless installation, free of nail holes and construction dings.

Door Jamb Options

Quail Hill has two door jambs to choose from. A two-piece jamb where the door stop is separate from the jamb and an integrated jamb where the door stop and jamb are one-piece.

TWO-PIECE JAMB

ONE-PIECE JAMB

DOOR HARDWARE

- 4-1/2 x 4 1/2 square HD ball bearing hinge
- Commercial grade flush bolts
- HD bi-pass, bi-fold and pocket door tracks and hardware
